ABOUT

I am a master's student in Computer Science with experience of 3.7 years in front-end and full-stack development. Proficient in JavaScript, React.js, Node.js, and MongoDB. Developed web applications optimizing performance, API integration, and UI/UX design. Hands-on experience in machine learning, data visualization, and cloud deployment. Strong problem-solving skills with achievements in competitive programming and technical writing. Recognized for efficiency improvements, reducing load times, and enhancing application reliability.

PROFESSIONAL EXPERIENCE

Temenos – Associate Product Engineer

Bangalore - India

Project 4: Optimizing the existing MYSQL Procedures – SACOM Bank

Sep 2024 – Dec 2024

- **Tools:** MSSQL, MYSQL, Postman, SQL Server
- **Role:** Developer
- **Team Size:** 3
- **Description:** We were tasked to enhance the response time of all the Procedure calls. As a part of this project. I had to enhance the stored procedures used, rewrite the logic efficiently and reduce the response time significantly by almost 80%.

Key Contributions Included:

- Refactoring complex nested queries into simplified, modular procedures.
- Implementing proper indexing strategies and query execution plans to improve data retrieval speed.
- Collaborating with QA using Postman to simulate API endpoints and validate performance gains.
- Resulted in an approximate 80% reduction in average execution time, significantly enhancing application responsiveness and end-user experience.

Project 3: Campaign Advertisement in the Application – SME and Retail Banking

Jan 2024 – Aug 2024

- **Tools:** Java, Postman, Eclipse, SQL Server, MySQL, JavaScript, React, AWS Lambda, Serverless Framework
- **Role:** Developer
- **Team Size:** 3
- **Description:** Including the Campaigns in the Various Pages in the Application and in the website based on the type of user and the type of banking he chooses. Redirecting to the appropriate website upon clicking on the campaign without harming the user experience.

Key Contributions Included:

- Developed logic to conditionally render campaign content based on user roles and banking preferences.
- Utilized AWS Lambda and the Serverless Framework to handle backend logic and campaign delivery without increasing latency.
- Ensured smooth user navigation by optimizing redirection flows and minimizing UI disruption.
- Collaborated with QA via Postman for end-to-end API testing and validation of ad rendering logic.
- Helped improve user engagement metrics while maintaining a consistent, non-intrusive user experience.

Temenos – Associate Software Developer

Bangalore - India

Project 2: Approval Matrix – SME Banking

Aug 2023 – Dec 2023

- **Tools:** Java, MSSQL, MYSQL, Maven, JavaScript, React, Eclipse
- **Role:** Developer
- **Team Size:** 5
- **Description:** Frontend, backend, and Schema design to create and maintain approvers for any transaction created, Manage the minimum approval count, execute the transaction when required number of approvals are acquired, Discarding the transaction when any approver rejects it and sending alerts appropriately to all parties involved.

Key Contributions Included:

- Designed and implemented the schema to handle multi-level approvers, approval statuses, and audit trails.
- Built frontend interfaces using React to view, assign, and manage transaction approvals with real-time status updates.
- Developed backend logic in Java to monitor approval counts, execute transactions upon meeting the required approval threshold, and handle rejections by discarding transactions.
- Integrated alert systems to notify all involved parties of approval or rejection via status updates and system notifications.
- Ensured consistency and data integrity throughout the approval process with transactional checks and validations.

Project 1: Cardless Cash Withdrawal – Mobile Banking

Dec 2021 – July 2023

- **Tools:** MySQL, Postman, JavaScript, React, Node.js, TypeScript, GraphQL.
- **Role:** Developer
- **Team Size:** 4
- **Description:** Frontend and backend to create the flow for selecting the account and amount to be withdrawal and cash withdrawal code to be enter on the ATM and creating the transaction based on the withdrawal status and Triggering alerts to the user upon transaction creation.

Key Contributions Included:

- Developed user interfaces using React and TypeScript to allow users to select linked accounts and enter withdrawal amounts.
- Implemented backend logic using Node.js and GraphQL to generate secure, time-bound withdrawal codes for use at ATMs.
- Integrated MySQL to store and track transaction status, ensuring accurate record-keeping and traceability.
- Created a notification system that triggers real-time alerts (via SMS or in-app) to inform users about transaction status and ATM code generation.
- Ensured the flow met banking security standards while providing a seamless, user-friendly experience.

TATA Consultancy Services – Associate Systems Engineer

Hyderabad, India

Project -1: Virgin Airways

July 2021 – Dec 2021

- As a systems Engineer at TCS, I contribute to developing and maintaining client focused, next generation software solutions. My responsibilities encompass web application development, debugging, maintenance, covering core application logic and other processes.
- Collaborated with Agile Scrum teams, participating in sprint planning, code reviews, and daily standups.
- Utilized Git, source tree, and Postman for version control and automated testing.

LANGUAGES & TECHNOLOGIES

Programming Languages: C, C++, Java, JavaScript, Python, TypeScript

Skills: HTML, CSS, D3.js, React JS, Node JS, Tailwind CSS, Responsive Design, Data Structures & Algorithms

Database: MySQL, MSSQL, MongoDB

Methodologies: Agile, Scrum

Tools: Eclipse, VS Code, GitHub, Git, Kony Visualizer, Quantum Fabric (middleware), JIRA, AWS, Postman

CERTIFICATIONS

Postman Essentials Training – LinkedIn Learning: API testing and automation with Postman.

Code Path Web 102 (Spring 2025): Hands-on experience with React.js, Tailwind CSS, and Supabase for building full stack web applications.

Responsive Web Design – freeCodeCamp: Covers HTML5, CSS3, and JavaScript to create mobile-friendly, accessible, and responsive web interfaces.

EDUCATION

Kent State University

Kent, OH

Master's in computer science (GPA: 4/4)

Jan 2025 – May 2026

Bachelor of Technology

Tirupati, India

Computer Science and Systems Engineering (GPA: 3.8/4)

Aug 2017 – June 2021
